Anna University, IRTT Erode — 2020 — 77.1%

12th — SRV Girls HSS, Namakkal — 2016 — 85.3%

10th — SRV Girls HSS, Namakkal — 2014 — 94.4%

LANGUAGES

English — Professional

Tamil — Native

PRIYANKA R

FULL STACK DEVELOPER — ANGULAR & JAVA

PROFILE

Full Stack Developer with 4+ years of experience building scalable web applications using Angular, Java, and Spring Boot. Skilled across the full development lifecycle, from API design to responsive front-end implementation, with strong collaborative and debugging abilities.

EXPERIENCE

Provility Software Solutions | Software Engineer, Chennai

Oct 2021 – Present

- Developed scalable web applications using frontend (JavaScript, TypeScript, RxJS, Redux) and backend (Java, Spring Boot, Groovy, .NET) technologies.
- Built applications with Angular and Ionic frameworks for rapid, cross-platform development.
- Used Jira, GitHub, and Bitbucket for collaborative development and issue tracking.

PROJECTS

RoboGebra | AI-driven math learning platform

Oct 2024 – Present

- Architected and delivered a personalized learning dashboard, integrating progress analytics, learning timelines, and both detailed and short-form answers.
- Built a scalable Study Reminder system with flexible scheduling, notification delivery, and robust REST APIs, improving user consistency and retention.
- Designed and implemented the Study List module, enabling students to create, organize, and track academic goals with real-time data sync.
- Developed an advanced AI-powered math explanation engine generating step-by-step, bilingual (Tamil/English) explanations.
- Engineered the interactive Quiz Module with instant evaluation, solution walkthroughs, and AI explanation integration.
- Implemented real-time computation and visualization, letting users modify values and instantly view updated graphs and insights.

Subsea | Marine equipment & operations platform

Apr 2024 – Sep 2024

- Implemented the Schedule-Manager module with .NET backend APIs for managing subsea schedules.
- Utilized Kendo UI Grid for complex UI functionality and built dynamic category/subcategory management features.
- Fixed production bugs and refined architecture for modularity and reusability.

Backoffice UI Migration | Angular version upgrade

Feb 2024 – Mar 2024

- Migrated four repositories — including the Ticketing web app and three SSG plugin apps — to Angular 16.

EasyVisa | Visa management system for attorneys

Nov 2021 – Jan 2024

- Built the document portal module with multi-panel accordion uploads and custom Angular Formly components.
- Built nested reactive forms, reusable components, and unit test coverage across UI components and services.
- Assisted in documenting software specifications and user manuals, supporting smoother handoffs to QA and stakeholders.
